

CASE STUDY

Company

Adventure Works is in the sports goods business. It is a large, multinational manufacturing company that produces and distributes bicycles and accessories to global markets. The company has established itself as a trusted brand. However, with the entry of new competitors, their market share has been threatened.

Scenario

The company has decided to take a new approach to maintain its position in the market. As a result, Renee, the marketing director at Adventure Works, has asked you to conduct a sales data analysis project. Renee is responsible for creating and implementing marketing campaigns.

The goal of the project is to use the insights gained from the analysis of sales data to drive new marketing campaigns and improve the company's market share. The project aims to identify customer preferences, buying patterns, and trends, which will be used to create targeted marketing campaigns that will appeal to the company's existing customer base, and attract new customers.

To achieve this, you need to identify the key people in the business who can provide valuable insights into the company's current sales and marketing strategies. You must interview company managers with different responsibilities and roles to gain a comprehensive understanding of the company's sales and marketing operations.

Employees

These are the executives available that you can consider for an interview:

- Ricci is the customer service manager. She is responsible for ensuring that customers are satisfied with the company's products and services.
- Igor is the finance manager. He oversees the company's financial operations.

- Jane is the IT manager. She manages the company's information technology department.
- Renee is the marketing director. She develops and executes marketing strategies that advertise and publicize the business's goods and services.
- Sam is the research and development manager. Sam manages the company's research and development department.
- Alex is the security operations manager. She manages the company's operations, including security and maintenance.
- Nia is the legal counsel. She manages the company's legal affairs.
- Kane is the sales manager. He oversees the sales team and ensures that they meet their sales targets.
- Hassan is the human resources manager. He manages the company's staffing and employment resources.

SOLUTION

Understanding the context

The primary goal is to gain insights from sales data to drive new marketing campaigns which attract new customers and retain the existing ones. To achieve this we have to ask questions to the relevant stakeholders in order to understand the current market sales and market campaign.

Identifying the Stakeholders

Ricci, Customer Service Manager

- **Level of influence: Medium** - Ricci's medium level of influence is due to her role in customer service, which, while not directly responsible for sales or marketing, plays a crucial role in retaining existing customers and maintaining the company's reputation. Ricci's insights into customer satisfaction can help the data analyst understand the factors that impact the company's sales and inform recommendations for improving the customer experience.

- **Level of interest: High** - Ricci's high level of interest in the project comes from her responsibility to ensure that customers are satisfied with the company's products and services. The sales data analysis will help her identify trends and areas of improvement, allowing Ricci to make data-driven decisions to enhance customer satisfaction and contribute to the company's overall sales and market share.
- **Reason for selection:** Directly involved in customer satisfaction and feedback, Ricci is an important stakeholder in the sales data analysis project because of her role in ensuring customer satisfaction. Ricci's understanding of customer complaints, feedback, and preferences can provide valuable insights into areas where the company can improve its products and services. These insights can help the data analyst identify growth opportunities and inform future sales and marketing strategies.

Renne, Marketing Director

- **Level of influence: High** - Renee's high level of influence comes from her role as Marketing Director, where her responsibility is to drive marketing campaigns that boost the company's sales. Renee's insights into the effectiveness of existing marketing campaigns, customer preferences, and trends will help create a targeted analysis that can inform future marketing strategies.
- **Level of interest: High** - Renee's high level of interest in the project is rooted in her responsibility to improve the company's market share and attract new customers. The sales data analysis will help her identify trends and customer preferences, allowing her to make data-driven decisions to create more effective marketing campaigns that resonate with the target audience.
- **Reason for selection:** Directly involved in creating and implementing marketing campaigns. Renee is a key stakeholder in the sales data analysis project because she creates and implements marketing campaigns that promote the company's products and services. Renee's extensive experience in marketing, deep understanding of the company's marketing strategy, and ability to identify areas for improvement make her a vital source for the project.

Kane, Sales Manager

- **Level of influence: High** - Kane's high level of influence comes from his role as Sales Manager and his responsibility to ensure that the sales team meets their targets. Kane's deep understanding of the company's sales processes and performance directly impacts

the company's bottom line. As a result, Kane's involvement in the sales data analysis project is essential to ensure that the project aligns with the company's overall sales goals.

- **Level of interest: High** - Kane's high level of interest in the project comes from his responsibility to improve the sales team's performance. The insights gained from the sales data analysis will help Kane identify areas where the sales team can improve, allowing data-driven decisions that will enhance the sales process and increase the company's market share.
- **Reason for selection:** Directly involved in sales performance and understanding customer preferences. Kane plays a critical role in the success of the sales data analysis project and, as Sales Manager, is directly responsible for the company's sales performance. Kane's expertise in analyzing sales data, understanding customer preferences, and identifying trends make him an important asset.

Interview Questions

Renee (Marketing Director)

1. Can you provide an overview of the current marketing strategy and how it has evolved over the years?
2. How do you measure the effectiveness of marketing campaigns, and what key performance indicators (KPIs) do you track?
